

ELECTRIC VEHICLE TIME-OF-USE RATE

Complete the form below to sign up for this optional rate classification:

■ Term & Conditions :

The Electric Vehicle (EV-TOU) Charging rate applies to residential GVP members and is available to single-phase households with load requirements of 50kW or under. Members in multi-dwelling units are not eligible for this program. Vehicle-to-Grid (V2G) interconnections are not allowed.

I acknowledge that the terms and conditions of the Grand Valley Power EV-TOU Tariff will apply to this service until such time as cancellation is requested, or an electric vehicle is no longer eligible or found at the service location. I acknowledge that this is a month-to-month service. I represent that I have an electric vehicle that will be using EV battery charging and requires an external plug-in to charge. I further understand and agree to the following:

- I am responsible for submitting the current registration of my electric vehicle to GVP in order to qualify for this rate once per year;
- I understand the EV-TOU rate requires an enhanced standard meter with two-way communication capabilities;
- I am solely responsible for any and all costs associated with the purchase and the installation of any charger or necessary EV equipment; and GVP will retain ownership and operation of the enhanced meter.
- These EV-TOU terms apply only for electric service to the designated account and address. If you transfer service to another address, you will need to reapply for the EV-TOU rate.
- I agree to allow GVP to maintain necessary equipment (if applicable) to monitor and/or manage the EV load.
