

Grand Valley Power Wind Energy Adjustment

Applicability:

To all consumers served by the cooperative.

The Utility has contracted with its wholesale power provider to buy a specified amount of wind power at an additional charge of \$0.025 per kWh. The Utility shall make available to its customers, on a first come, first served basis, the option of purchasing that wind power in blocks of 100 kWh with the additional charge of \$0.025 per kWh being passed on to the customer. The commitment from the customer shall be on a take or pay basis.

Should the Utility receive a price change for wind energy from its wholesale power provider, it shall be passed on to those customers who have committed to purchase wind energy.
